**Practical No. 6 To install and configure NodeJS server and IDE.**

Download and install NodeJS server and IDE

1. Firstly download installers for both NodeJS and VSCode from official sites.
2. Run installer for NodeJS
3. After this window choose options accordingly.

4. Click next again click next and after some time NodeJS will be installed on Your PC.
5. After typing `node --version` I got the version number as shown below

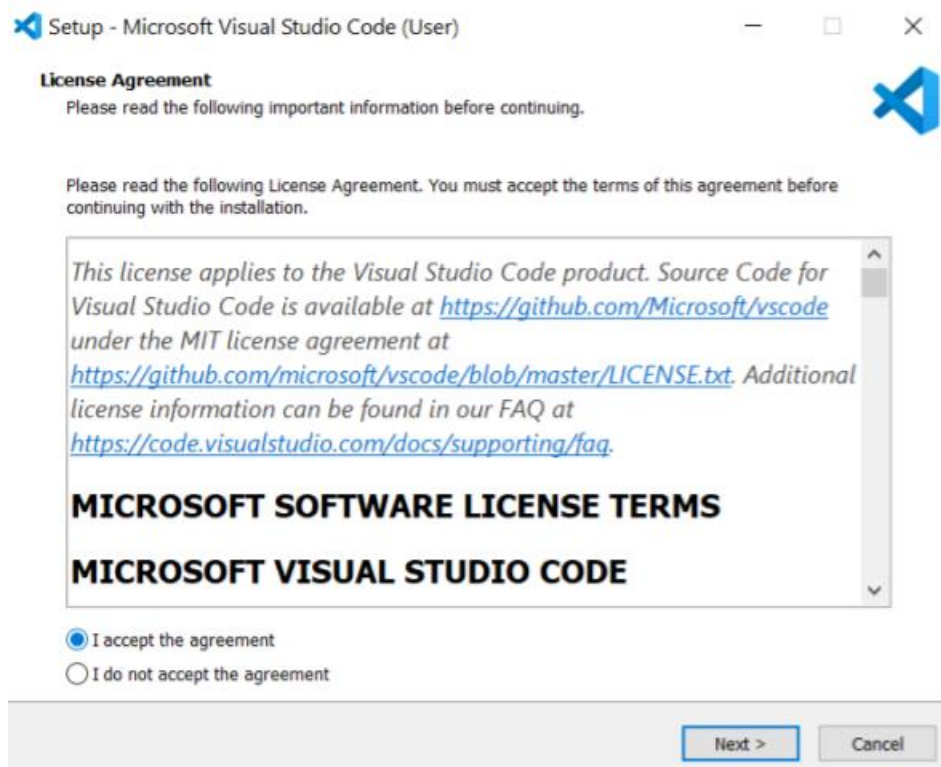

```
Command Prompt
Microsoft Windows [Version 10.0.22000.318]
(c) Microsoft Corporation. All rights reserved.

C:\Users\ASUS>node --version
v14.17.6

C:\Users\ASUS>
```

## Installation of VSCode editor

1. To install VSCode run the downloaded installer.
2. Accept all the terms and conditions.

3. Selected options that I require

#### 4. After clicking install VSCode was installed
